Arti K. Rai, Elvin R. Latty Professor, Duke Law School and Duke Institute for Genome Sciences & Policy

Arti Rai, Elvin R. Latty Professor, Duke Law School, and member, Duke Institute for Genome Sciences and Policy, is an authority in patent law, administrative law, and biopharmaceutical regulation. Her research on innovation policy in areas such as bioinformatics, software, and synthetic biology has been funded by NIH and the Kauffman Foundation. She has published widely in both peer-reviewed journals and law reviews and has edited several books, including *Intellectual Property Law and Biotechnology: Critical Concepts* (Edward Elgar 2011).

From 2009-2010, Rai served as the Administrator of the Office of External Affairs at the U.S. PTO, where she led policy analysis of the legislation that became the America Invents Act and worked to establish the PTO's Office of the Chief Economist. Rai regularly advises the National Academies of Science as well as agencies such as NIH and DARPA on policy issues. In 2011, Rai won the World Technology Network Award for Law. Rai graduated from Harvard College, attended Harvard Medical School, and received her J.D. from Harvard Law School.
