

**HIGH TECH LAW CURRICULUM**  
(2/5/2025)

This page has two purposes. First, it lists courses recently offered as part of the High Tech Law curriculum. Second, we anticipate offering certain courses on a predictable schedule. Where possible, we have indicated our expected plan. However, courses come and go and faculty members change their plans, so this page is necessarily incomplete and subject to change. If you really want to know if a particular course is being offered at a particular time, please contact us and we may be able to provide you with more current information about a course's availability.

Please note that several courses below are only applicable to one High Tech Law Certificate Specialization. Please double-check that the courses you want will count towards your targeted certificate/specialization.
