Patents

**Defensively:
Which
patents are
the riskiest
ones?**

Problem: Which Patents will be litigated?

Issuance

(12) United States Patent Zadesky et al.
(54) TOUCH PAD HANDHELD DEVICE
(75) Inventors: Stephen Paul Zadesky , San Carlos, CA (US); Tung Yew Tan , San Francisco, CA (US)
(73) Assignee: Apple Computer, Inc. , Cupertino, CA (US)
(*) Notice: Subject to any disclaimer, the term of this patent is extended or adjusted under 35 U.S.C. 154(b) by 117 days.
(21) Appl. No: 10/188,182
(22) Filed: Jul. 1, 2002
(65) Prior Publication Data US 2003/0076306 A1 Apr. 24, 2003
Related U.S. Application Data
(60) Provisional application No. 60/359,551, filed on Feb. 25, 2002; provisional application No. 60/346,237, filed on Oct. 22, 2001.

Related U.S. Application Data

(60) Provisional application No. 60/359,551, filed on Feb. 25, 2002; provisional application No. 60/346,237, filed on Oct. 22, 2001.

Methods

Data

- Matched pair set: 667 litigated patents and 3 x 667 unlitigated patents issued in 1990 and matched by primary PTO technology class (rare events model)
- Log-transformed versions of continuous variables

Coding

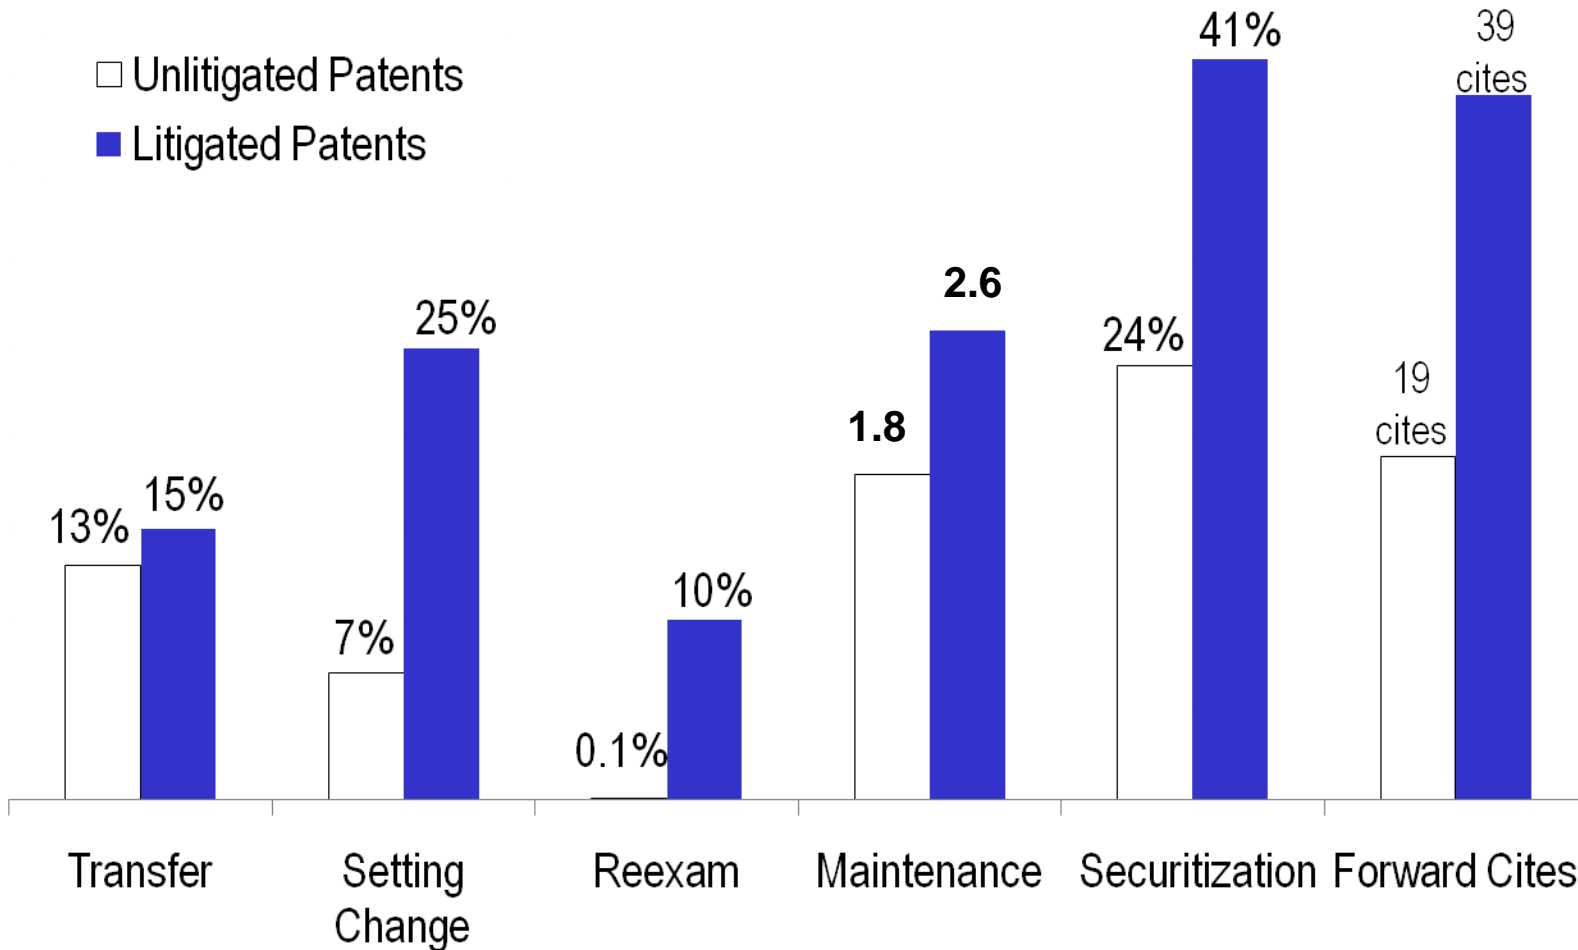

- Transfer: hand-coded to find true re-assignments and exclude M&A, intra-company transfers
- Reexamination: ex parte only

Statistics

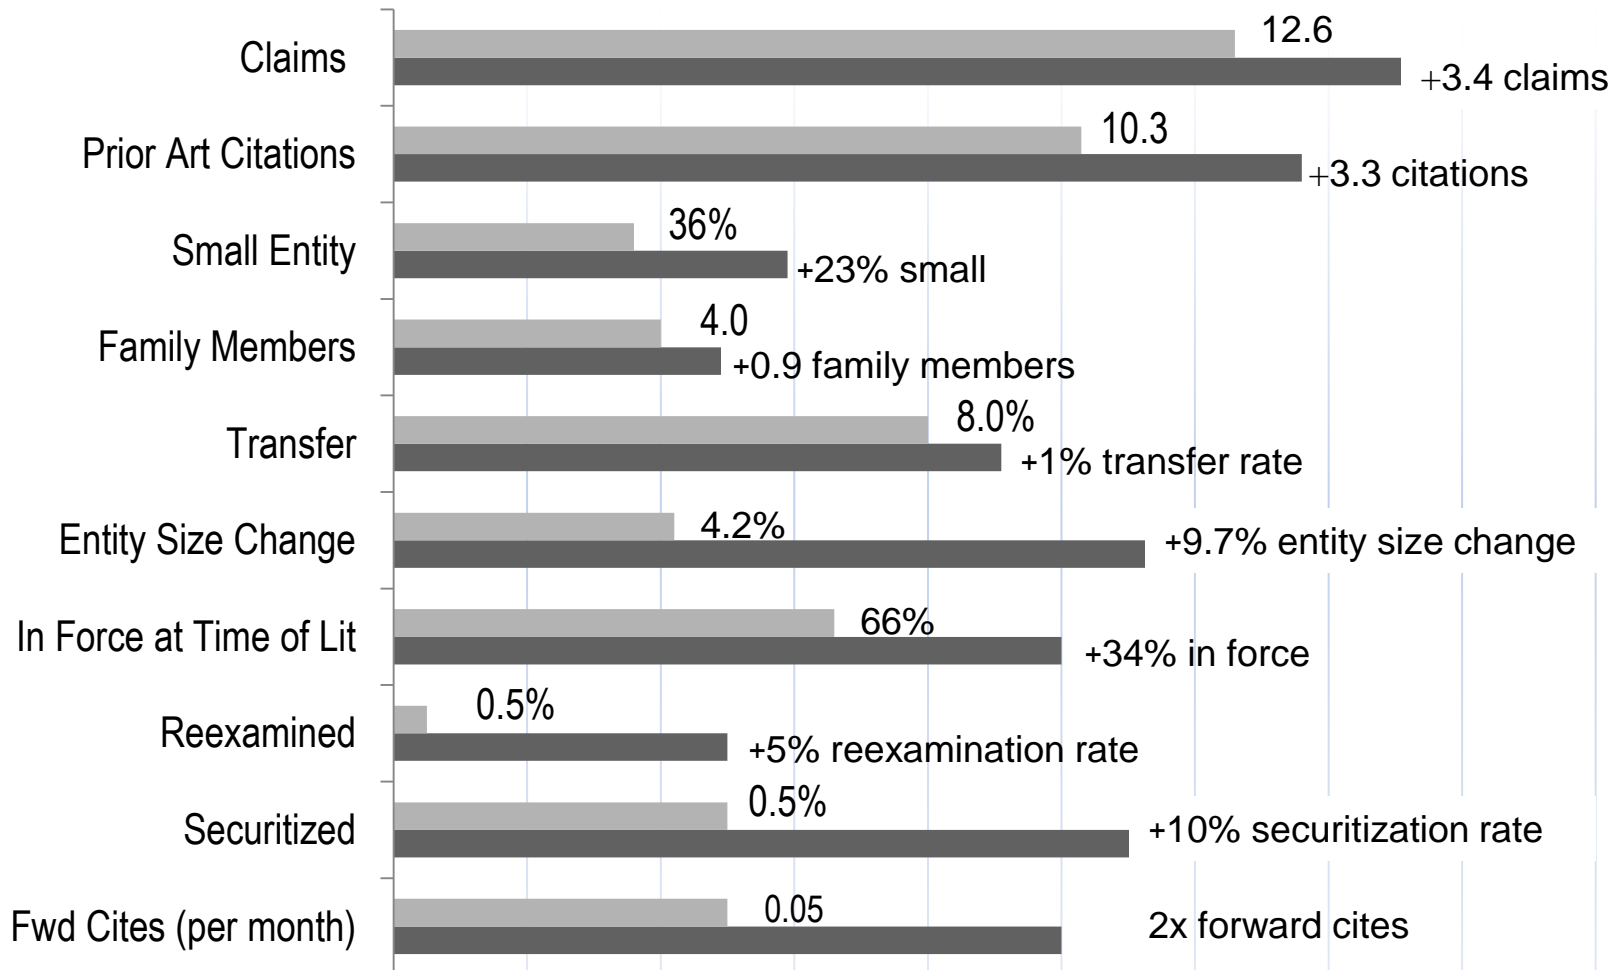

- Logistic regression (SPSS)
- Characteristics developed over life and prior to first litigation (time-series)
- Intrinsic, acquired, and intrinsic + acquired

Litigated vs. Unlitigated Patents – Acquired Traits (Characteristics Developed Over Patent Lifetime)

□ Unlitigated Patents
■ Litigated Patents

Litigated vs. Unlitigated Patents (Characteristics Developed Prior to Litigation)

Logistic Regression Model Results (Time-Series)

Variables in the Equation	Lifetime Model (Characteristics Acquired over Patent Life)			Time-Series Model (Characteristics Acquired Prior to Filing of First Litigation)		
	Intrinsic Variables Only	Acquired Variables Only	Intrinsic and Acquired Variables	Intrinsic Variables	Acquired Variables	Intrinsic and Acquired Variables
Nagelkerke R Square	.106	.334	.380	.104	.372	.418

****s convey significance of Difference.**

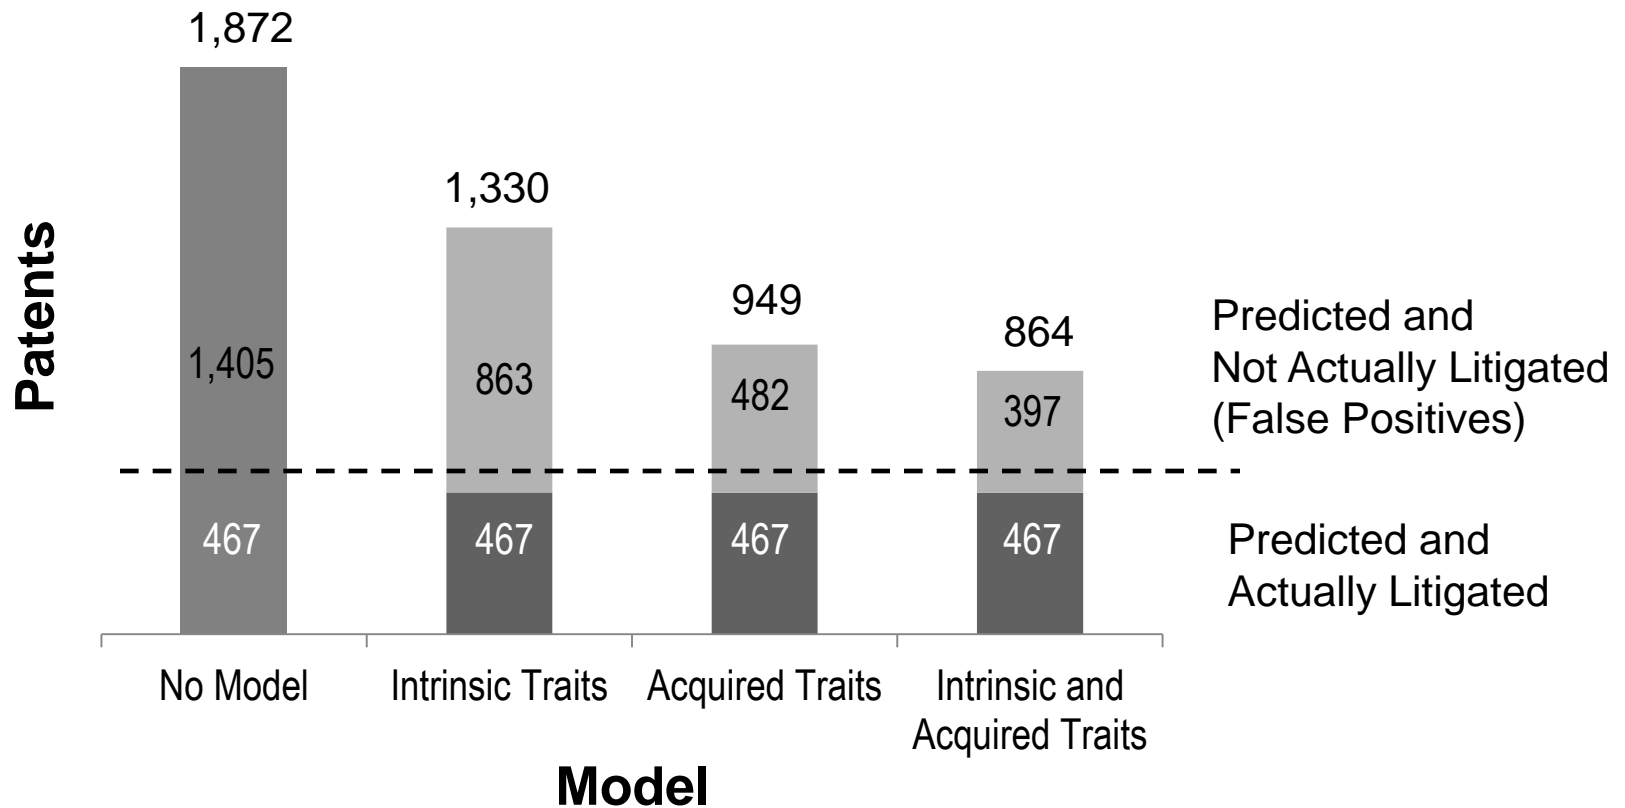

More stars = difference more likely to be real

Predicted v. Actually Litigated Patents (Time-Series)

<u>Model</u>	<u>Nagelkerke R2</u>
Intrinsic Characteristics	.104
Acquired Characteristics	.372
Intrinsic and Acquired Characteristics	.418

Bigger (R2) is Generally Better

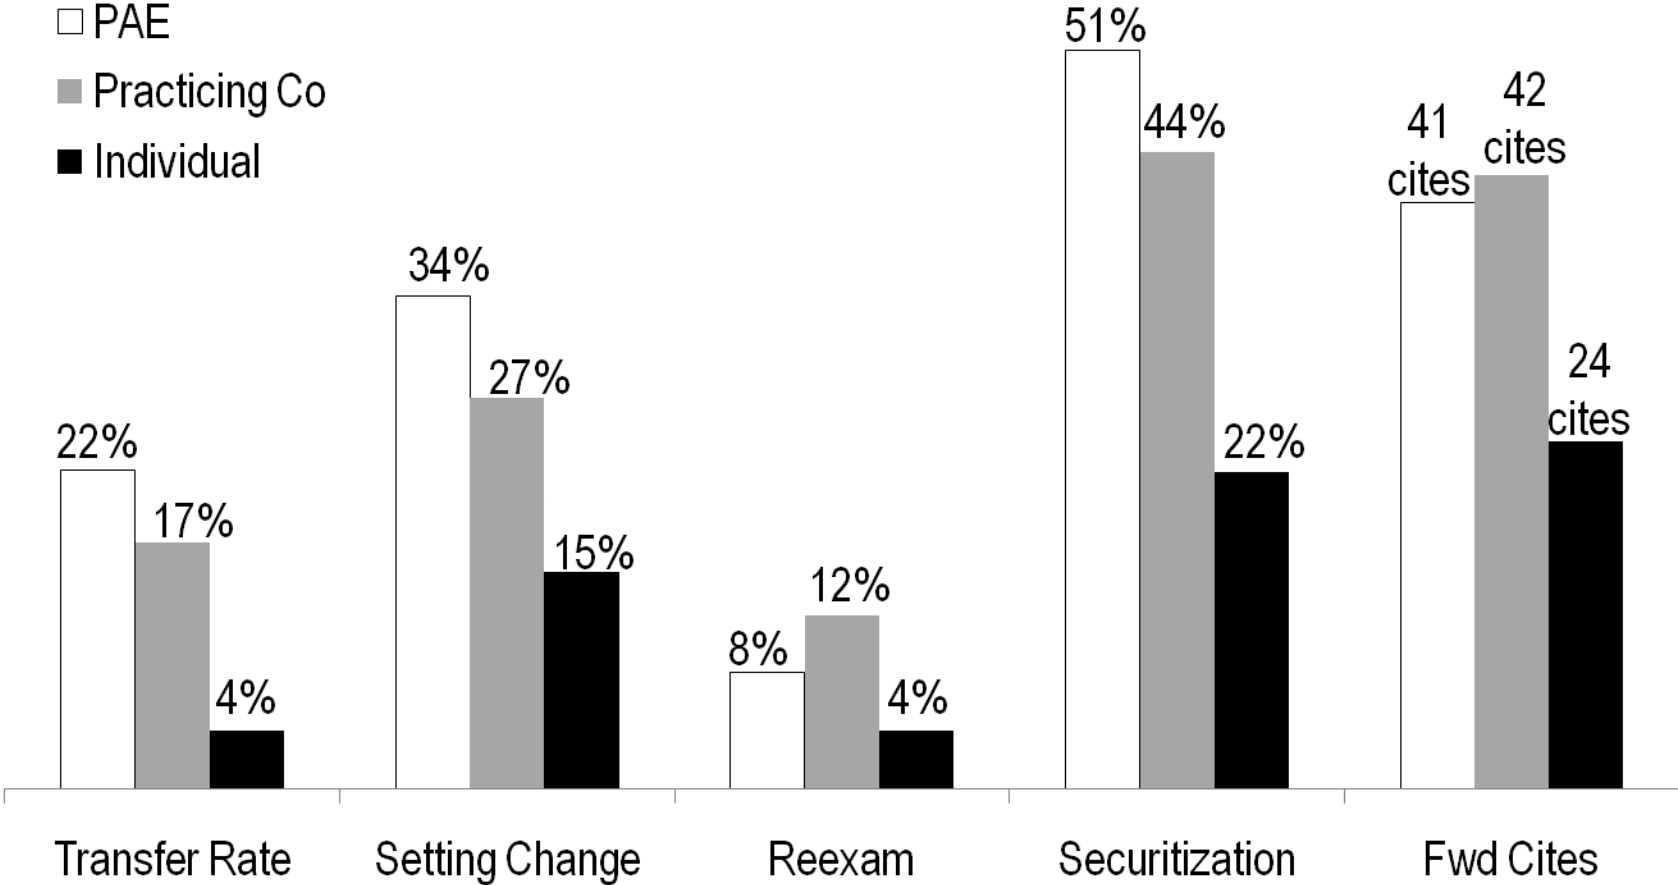

Payoff: Predicted v. Actually Litigated Patents (Time-Series)

70% observation rate

Differences by Litigant Type

- PAE
- Practicing Co
- Individual

Implications

Potential uses of this work

- **Patent Defense 1.0: freedom to operate, R&D planning and decision-making**
- **Patent Defense 2.0: defensive buying/aggregation, reexamination, insurance**

Policy implications

Patent risk is a function of value and ownership

- **A new kind of patent notice failure. Not a problem of what does this patent cover, but who owns the patent , what they do with it. Those transactions aren't required to be recorded, should they be?**
